

Tank Console

The Centeron Tank Console is used with any of the Centeron tank monitors to form a highly dependable wireless tank gauging system. The Tank Console displays the status of inventory in up to 10 storage tanks on a backlit LCD that is easy to read day or night. Use it to monitor any size tank, from the smallest up to 10M gallons. And, the wireless data link between each tank and the Tank Console eliminates the expense associated with typical wired systems. Installation is quick, easy and inexpensive.

Features:

- Backlit LCD display
- Displays "Gallons on Hand" or "Ullage"
- Displays units in gallons, liters, imperial gallons, inches, or centimeters
- Displays product ID and tank ID
- Two scroll buttons for easy tank selection
- Tamper proof settings through integral serial port

Specifications:

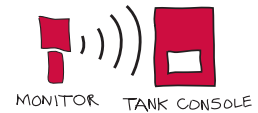

- Tank capacity: Up to 10,000,000 gallons
- Tanks supported: 10
- Tank Content Display: 0.80 inches high, 7 digits
- Product and Tank ID Display: .16 inches high, 15 characters
- Input: 115 VAC
- Enclosure: Nema 4x - 9.4"L x 6.4"W x 3.5"H
- Operating Temperature: -40° F to +160° F
- Radio Range: 1-mile line of sight, 500 ft. obstructed
- Certified to UL 61010B-1 and CAN/CSA-C22.2 No. 1010.1-92
- FCC Part 15 approved

The Centeron System

We start with an easy to install monitor. It's wireless, so no special know-how or tools are needed. It's powerful, too. Our DSSS radio technology is far superior to the narrow bandwidth radios found in other wireless systems. That means you receive your data even in the harshest environments.

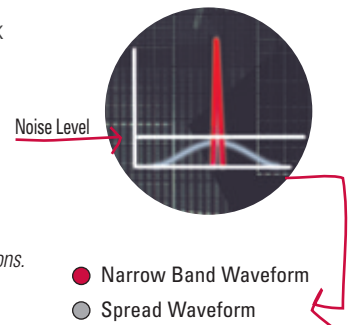

Each tank monitor sends its tank level information to the Tank Console

where it is immediately displayed on an easy to read LCD screen. You get all of your tank information at one location for convenient, up to date inventory monitoring so you can manage your business better.

Call 1-865-981-3118 and speak directly to a Robertshaw applications engineer.

Exceptional DSSS radio technology is superior to narrow band systems, resulting in more reliable communications. So advanced, it's already the recipient of 12 patents, with additional pending.
